---

[1] We are not able to test for every district ect. So we don't know all the implications for this method. Contact us if worried about the safety of your device.
[2] We are not responsible for what happens, do this at your own risk.

9. **Sign in.**
10. **Quickly go to your blocked site of choice. Do not refresh the site page.**
11. **If you have a third party forcing you to refresh tabs, to the letter follow these continuing steps.**
    11.1. **Go to the site and move it to another window or desk.**
    11.2. **When you close your device immediately check you're on another window or desk. Desk is prefered.**
    11.3. **Wait until it refreshes in that window (approx 1 - 2 min)**
    11.4. **Repeat next time you close your device.**

Method #2, Removes ALL extensions for up to 96 hrs (Established 2020)
NOTICE. IMPORTANT. BACKUP FILES IN GOOGLE DRIVE. HARD DISK DATA WILL BE CLEARED.

Preface (things to know)
- **After this method your hard disk will be cleared (Downloads Folder)**
  - **To save your files back them up with google drive.**
- **After this method you will have to reinstall google play apps and any unauthorized google play apps you will not be able to reinstall without future permission from your administrator.**
- **This Method is SAFE[3] and we are CONFIDENT it will not corrupt or break your computer**
- **If you would like to watch the video tutorial click here Tutorial Coming Soon**
- **If you have already done it before and have not disabled passphrase go to step 8.**
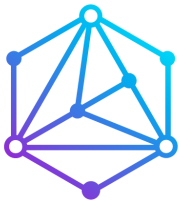

Items of Importance
➢ **Separate Device with settings and google accounts unadministered.**

Steps
1. **Either go to Google Settings; chrome://settings; chromebook settings; or sign into your account on a separate unadministered device and go to google settings.**
2. **Find sync and click on it.**
3. **If you are on mobile click "Yes I'm in", and then click on sync again. If not, proceed to the next step.**
4. **Find the Sync Passphrase Settings. On mobile you will have to click on Encryption first.**
5. **Click, "Encrypt synced passwords with your Google Account".**

---

[3] We are not able to test for every district ect. So we don't know all the implications for this method. Contact us if worried about the safety of your device. Some districts enable account disability after removal of some extensions.

6. **Enter a memorable password. Preferable your regular account password to access the device.**
7. **Click done and proceed.**
8. **You will then reset your chromebook. Press esc + power + reload (↻)**
9. **Press ctrl + d.**
10. **Press Enter to Confirm (X2)**
11. **Sign into the wifi**
12. **Press Agree**
13. **Wait for Enterprise Enrollment to finish and press next.**
    (approx 5 - 25 sec)
14. **Sign in to your chromebook.**
15. **Turn off wifi immediately after signing in at first chance.**
16. **Open your browser and go to chrome://extensions**
    If you see the extension that you are trying to disable then press Power + Refresh without pressing esc.
17. **Click sign in with an existing user.**
18. **Enter your login info.**
19. **Go to chrome://extensions. There are two possibilities.**
    19.1. *Says, "This extension may have been corrupted".* **This is good news. This shows the process has passed. Turn on the wifi and wait ~2 minutes. You are finished if it does not uncorrupt. Reply in feedback if the process uncorrupts.**
    19.2. *Does not show up or Wrong Extension Blocked.* **This text means either one of the steps was done incorrectly or the process has passed. Turn on the wifi If the extension appears immediately, do power + refresh without esc.**
20. **The extensions will appear again after ~24 - 36 hrs..If they do reappear, you can do Power + Refresh without esc, and the extensions will be disbale for another further ~24 - 36 hrs**

Notes;
If you want to re add the extensions, restart your device. If you want your bookmarks to return,, click sync passphrase off, (on a separate device) and restart your chromebook. restart will undo the extension removal!
